## Deep Dive: Maintenance Tips for the 2019 Dodge Journey

Regular maintenance is the cornerstone of a reliable vehicle. Below is a more detailed look at the key maintenance tasks outlined in the owners manual, along with additional expert advice.

### 1. Engine Oil & Filter Replacement

The manual recommends an oil change every 7,500 miles or 12 months, whichever comes first, using a 5W 30 synthetic blend. Switching to a fully synthetic oil can extend the interval to 10,000 miles under certain driving conditions.

### 2. Transmission Fluid

Check the transmission fluid level every 10,000 miles. The manual specifies a particular type of fluid—often a Dodge approved ATF (Automatic Transmission Fluid). Use a dipstick or a service tool to verify the fluid's color and condition.

### 3. Tire Care

Rotate your tires every 5,000 miles to promote even wear. Keep the tire pressure at the manufacturer's recommended level (usually 32–35 psi). Inspect for sidewall damage or tread wear.

### 4. Brake System

Inspect brake pads and rotors every 15,000 miles. Replace pads when the thickness falls below 3 mm. If you notice a squealing noise, it may indicate the need for new pads.

### 5. Cooling System

Flush the coolant every 3 years or 30,000 miles. Use a Dodge approved coolant with the proper mixture of antifreeze and water. Check for leaks around the radiator and hoses.

### 6. Battery Maintenance

Inspect battery terminals for corrosion and ensure a firm connection. Clean the terminals with a mixture of baking soda and water, then rinse with clean water. Replace the battery every 4–5 years.

### 7. Air Filters

Replace the engine air filter every 15,000 miles. The cabin air filter should be replaced every 20,000 miles or when you notice reduced airflow or unpleasant odors.
