What Is A River Runs Through It?

At its core, *A River Runs Through It* is a semi autobiographical narrative that follows the lives of two brothers, Paul and Norman Maclean, growing up in the remote town of Missoula, Montana. The story is set against the backdrop of the Clark Fork River, a place that becomes a character in its own right, shaping the brothers' experiences and their relationship with each other.

The book blends personal reflection, vivid descriptions of fly fishing, and philosophical musings on faith and mortality. Although it reads like a novel, the narrative is anchored in Maclean's own memories, giving it an intimate, almost confessional tone.
