Introduction

In the world of grooming, a high quality beard trimmer is more than just a tool—it's an extension of your personal style. Whether you're maintaining a sharp, clean shaven look or cultivating a full, textured beard, the right trimmer can make all the difference. Among the myriad of options on the market, the **Argos Remington beard trimmer** has carved out a reputation for reliability, precision, and value. This comprehensive guide will walk you through every aspect of the Argos Remington line, from its features and performance to maintenance tips, buying advice, and real world reviews. By the end of this article, you'll have the knowledge you need to determine if this trimmer is the right fit for your grooming routine.

What is the Argos Remington Beard Trimmer?

Overview

The Argos Remington beard trimmer is a line of electric grooming devices sold exclusively through the Argos retail network in the UK. These trimmers combine Remington's long history of personal care technology with Argos' focus on affordability and customer service. Each model is engineered to deliver consistent cutting performance, ergonomic handling, and a range of adjustable settings to accommodate every beard style.

Brand History

Remington, founded in 1875, has been a pioneer in personal care technology for over a century. From the first electric razor to modern beard trimmers, the brand has consistently prioritized innovation and user experience. Argos, a well known UK retailer, partnered with Remington to bring these trusted products directly to consumers at competitive prices. The collaboration leverages Remington's expertise in cutting technology while offering Argos' extensive distribution network and customer support.

Product Lineup

The Argos Remington beard trimmer collection includes several models tailored to different needs:

- Remington RBL10 – A budget friendly entry point with essential features.
- Remington RBL12 – Adds a rechargeable battery and extended guard options.
- Remington RBL13 – The flagship model featuring a titanium coated blade and an advanced battery system.

While each model shares core Remington technology, they differ in battery capacity, guard range, and accessory bundles.

Features & Specifications

Cutting Performance

All Argos Remington beard trimmers employ Remington's signature **Precision Blade System**, a high titanium alloy blade that offers a razor sharp cutting edge. The blades are engineered to maintain a consistent angle, ensuring even trimming across the entire beard length. Many models also include a **self sharpening mechanism** that reduces the need for frequent blade replacement.

Battery Life & Charging

Battery performance varies by model:

- RBL10 – 2 hour runtime on a full charge, charging via a USB port.
- RBL12 – 3 hour runtime, 45 minute charging time.
- RBL13 – 4 hour runtime, 30 minute charging time with a fast charge feature.

All models include a **LED battery indicator** that provides real time status, ensuring you never run out of power mid trim. The fast charge capability of the RBL13 is especially useful for on the go users who need a quick power boost.

Adjustable Guard System

The Argos Remington trimmers come with a range of guard attachments that allow you to set the desired beard length with precision. The guard system is designed to be:

- Easy to attach and detach – One click mechanism.
- Durable – Made from high grade ABS plastic.
- Wide range – Typically ranging from 1 /mm to 30 /mm, covering most beard styles.

Some models, like the RBL13, feature a **micro adjustment slider** for fine tuning the guard length, giving you ultimate control over your look.

Ergonomics & Design

Ergonomics is a key differentiator for the Argos Remington line. The trimmers feature a **contoured grip** that reduces hand fatigue during extended use. The weight distribution is balanced to minimize wrist strain, and the device's matte finish enhances grip even when hands are damp. Additionally, the **noise reduction technology** ensures a quiet operation, making the trimmer suitable for use in quiet environments such as offices or shared living spaces.

Additional Accessories

Most Argos Remington models are bundled with a set of accessories that extend functionality:

- Extra guard attachments.
- Cleaning brush for debris removal.
- Replacement blade kit.
- Portable travel pouch.

These accessories add value, especially for those who want to maintain optimal performance without additional purchases.

How to Use & Maintain

Setup & Initial Use

Before first use, charge the trimmer fully. Once charged, remove the protective cap from the blade area. Attach the desired guard length, ensuring it clicks into place. Turn on the device by pressing the power button and start trimming. The device will automatically adjust to the guard length you've selected, providing a consistent trim across your beard.

Cleaning & Oiling

Regular cleaning is essential to keep the trimmer sharp and hygienic. After each use:

1. Detach the guard and blade assembly.
2. Rinse the blades under running water (many models are water resistant).
3. Use the cleaning brush to remove hair clippings from the blades and guard.
4. Apply a drop of Remington approved blade oil to keep the blades lubricated.

Allow the blades to dry completely before reassembling to prevent corrosion.

Storage & Battery Care

Store the trimmer in a dry, cool place. Avoid leaving it in direct sunlight or extreme temperatures, as this can degrade the battery. If you plan to store the trimmer for an extended period, charge the battery to about 50% and disconnect the charger to avoid over charging. When using the trimmer for the first time after a long storage period, let it fully charge before use.

Pros and Cons

Pros

- High quality blades that stay sharp longer.
- Long battery life with fast charge options.
- Extensive guard range for versatile styling.
- Ergonomic design reduces hand fatigue.
- Comprehensive accessory bundle.
- Competitive pricing through Argos.

Cons

- Limited to Argos' distribution network; not available in all regions.
- Some users report a slight noise level during operation.
- Replacement blades can be a bit pricey compared to generic options.
- The bulkier models may be less convenient for travel.

Comparison with Other Beard Trimmers

Remington vs Philips vs Braun

When comparing the Argos Remington trimmers to other leading brands, several factors stand out:

- Blade Technology – Remington uses a high titanium alloy, while Philips often employs ceramic blades. Both offer sharpness, but Remington's blades tend to retain edge longer.
- Battery Capacity – Remington's RBL13 offers a 4 hour runtime, slightly above the average for Philips and Braun models.
- Guard Options – Remington's guard range is comparable to Philips but offers a micro adjustment slider not always present in Braun models.
- Price Point – Argos Remington trimmers are generally priced lower than Philips or Braun equivalents while maintaining comparable performance.

Price Comparison

Below is a snapshot of current pricing (UK market) for comparable models:

- Argos Remington RBL13 – £49.99
- Philips Norelco Beard Trimmer 4000 – £59.99
- Braun BT7240 – £69.99

The Argos Remington offers a compelling balance between cost and performance, especially for budget conscious consumers.

Which One Suits Different Needs?

Choosing the right trimmer depends on your grooming habits:

- Daily quick trim – RBL10 or RBL12, with short runtime and basic guards.
- Full beard maintenance – RBL13, for longer runtime and finer guard control.
- Travel use – Compact models with a USB charger and travel pouch.
- Premium grooming – Consider Philips or Braun if you prioritize ultra quiet operation or unique blade materials.

Buying Guide

What to Look For

- Blade Quality – Titanium or stainless steel for longevity.
- Battery Life – At least 3 hours on a full charge.
- Guard Range – Minimum of 1 /mm to 30 /mm.
- Ergonomics – Contoured grip and lightweight.
- Accessories – Extra guards, cleaning brush, and travel pouch.

Where to Buy

Argos is the primary retailer for these trimmers. You can purchase online through the Argos website or in one of their physical stores. Argos frequently offers promotional discounts, especially during holiday seasons.

Warranty & After Sales

Argos Remington trimmers come with a standard **12 month limited warranty** covering manufacturing defects. Replacement parts such as blades are available through Argos' customer service portal. For extended coverage, consider purchasing a separate warranty plan if you anticipate heavy usage.

Customer Reviews & Ratings

Real world feedback often provides insight beyond specifications. Here's a synthesis of common themes from user reviews:

Common Praises

- Sharp, clean cuts without pulling.
